

## MKF 240 (E3) - Environmental simulation chamber for complex alternating climatic profiles

The MKF series is ideally suited for all tests in accordance with current temperature and climatic test standards based on DIN and IEC standards. The required temperature and humidity values can be attained rapidly and maintained accurately, even under extreme conditions. The unparalleled ease of operation as well as extensive standard features provide that 'little extra' in handling.

### ► Performance features and equipment :

- Electronically controlled APT.line™ preheating chamber assuring temperature accuracy and reproducible results
- Temperature range without humidity -40 °C to 180 °C (-40 °F to 356 °F), with humidity 10 °C to 95 °C (50 °F to 203 °F)
- Humidity range 10 % RH to 98 % RH
- MCS controller with 25 storable programs of 100 sections each for a maximum of 500 program segments
  - User friendly LCD screen
  - Easy-to-read menu guide
  - Integrated electronic chart recorder
  - Variety of options for the graphic display of process parameters
  - Real time clock
- Electronically controlled humidification and dehumidification system with capacitive humidity sensor and pressurized steam humidification
- Integrated water storage tank
- Heated viewing window with interior illumination
- Programable condensation protection for test material
- Adjustable ramp functions via program editor
- Environmental friendly refrigerant R 404a
- 230 V power socket on the right-side operating panel
- Temperature safety device, Class 2 (DIN 12880)
- 4 potential-free relay outputs that can be activated via MCS controller
- Ethernet interface for use with optional GMP/GLP and FDA guideline 21 CFR Part 11 compliant APT-COM™ DataControlSystem software
- 1 access port Ø 50 mm (1.97 inch), left side
- 1 stainless steel rack included
- 4 castors (with 2 brakes)
- BINDER test certificate

1. Tap water [municipal] with a max. hardness of 8.0° dH = 1.4285 mmol/l.  
(The hardness can be established from the water analysis of your water supplier.)
2. We recommend the BINDER Pure Aqua Service for longer maintenance intervals, regardless of water quality.
3. Demineralized or deionized water available at the customers location.

- 1) Lower values are valid at an ambient temperature of max. 25 °C (77 °F)
- 2) Depending on the set-point
- 3) to 98% of the set value
- 4) Upon door opening > 1.5 % RH, recovery time approx. 20 min.
- 5) Within a range from 25 °C (77 °F) to 95 °C (203 °F) and < 90% RH

All technical data is specified for units with standard equipment at an ambient temperature of 25 °C and a voltage fluctuation of ±10 %. The temperature data is determined in accordance to factory standard following DIN 12880 respecting the recommended wall clearances of 10 % of the height, width and depth of the inner chamber. All indications are average values, typical for units produced in series. We reserve the right to alter technical specifications at all times.

## ▶ Notch-type access port in door

Provide easy connection of cables to test specimens and facilitate loading and unloading of the chamber. Doors have access ports measuring 100 x 35 mm (4 x 1.4 inches), which can be sealed with the included silicon plugs.

## ▶ Reinforced rack

To ensure safe and stable storage of heavy test specimens. Stainless steel, with 1 set of securing elements (4 pieces), max. load 70 kg (154 lbs.)

## ▶ Specimen temperature measurement

Additional flexible PT 100 temperature sensor for precise temperature measurement of the specimen with digital temperature display. Recording of measured data possible via Ethernet or RS 422 interface.

## ▶ External fresh water supply set

External fresh water supply set consists of fresh and waste water canister, cabling and pump.

## ▶ BINDER Pure Aqua Service

Our efficient, flexible water purification system delivers top water quality and extends the maintenance period. Special feature: Our system uses a disposable purification cartridge and also has a water quality indicator.
