

X190

THERMAL IMAGING CAMERA

The X190 thermal imaging camera, powered ISG technology, is a tactical support camera with basic functions. Developed to be a simple one button ON/OFF operation, the X190 uses firefighting -specific core technology that operates with the same principles found in the X380. This capability provides uniform scene interpretation across the range of cameras which simplifies training requirements between each camera model.

PRODUCT HIGHLIGHTS

- Easy to use, one-button, simple operation
- Tactical Colour - Achieve crisp, clear image performance in temperatures above 1093°C with our unique transparent colour
- Intelligent Focus™ - See an object in crystal-clear detail with no manual adjustment required
- Full size 3.5" (89mm) - No sacrifices in LCD size

X190 THERMAL IMAGING CAMERA

POWERED BY ISG TECHNOLOGY

Lightweight Design – At only 1.1kg, the X-Series of cameras are some of the lightest thermal imagers on the market today. The pistol-grip handle is easy to hold with gloved hands and the balanced design limits torque on the wrist, reducing fatigue.

Intelligent Focus™ – See an object in crystal clear detail, hands-free. No turning knobs or throwing switches. The camera automatically adjusts to provide superior image quality even at temperatures above 1093°C. Easily and quickly switch between high and low temperatures by placing the crosshairs on the object you wish to measure.

Tactical Colour – Achieve crisp, clear image performance in temperatures above 1093°C. As the temperature increases, colours grow in intensity from grey, yellow, orange, to red. Unique transparent colour capability enables firefighters to see structure through the colourisation.
