

Part List for the Lifeline AED

Item	Part Number	Image	Description
Standalone trainer AED package	DCF-E350T		The stand alone trainer package includes a trainer AED (can't be used to deliver a defibrillation shock), training pads, rechargeable training battery, battery charger and remote control for ease of use.
5 or 7 year battery pack (DBP-1400) with 9V lithium	DCF-200 DCF-210		This replacement battery pack has a standby life (installed in the unit) of 5 years (125 shocks or 8 hours of continuous operating time) or 7 years (300 shocks or 16 hours of continuous operating time), including daily, weekly, monthly and quarterly self-tests.
Training conversion kit	DCF-303T		This training package consists of the rechargeable training battery, battery charger and training software. It allows a Lifeline AED to be used for training to simulate rescue scenarios without delivering a defibrillation shock (training pads not included)
Replacement adult defibrillation pad package (1 set)	DDP-100		This package contains one pair of defibrillation pads for use with the Lifeline AED. Pads should be stored connected to the AED. The pad package has a two year shelf life.
Replacement paediatric defibrillation pad package (1 set)	DDP-200P		This package contains one pair of paediatric defibrillation pads for use with the Lifeline AED. The pad package has a two year shelf life. These pads enable the Lifeline AED to be used with children under the age of 8. They reduce the energy delivered by the AED to 50 Joules (down from 150) to accommodate smaller victims.
Replacement adult training pad package (1 set) *non functional*	DDP-101TR		This package contains one pair of training pads to be used with a standalone trainer or training package (DCF-303T). These pads do not contain a conductive gel and cannot be used for a rescue.

Replacement adult training pad package (5 set) *non functional*	DDP-105TR		This package contains a set of 5 training pads without the electrodes that are attached to the replacement adult training pads (DDP-101TR).
AED soft carrying case	DAC-100 DAC-101		This carrying case is designed to hold a Lifeline AED, extra set of pads, an extra battery and any other accessories as needed. The case comes in black for carrying a Lifeline AED (DAC-100) and red for the training AED (DAC-101).
Wall mounted cabinet (DAC-210 – Non Alarmed) or (DAC-220 – Alarmed)	DAC-210 DAC-220		This cabinet allows a Lifeline AED to be mounted on a wall to increase visibility and to protect the AED from theft or damage. It is also available with a loud alarm, which sounds whenever the cabinet is opened.
Black wall mounted bracket	DAC-200		This bracket simply fixes to the wall with a strap to keep the defibrillator in place.
Hard carrying case	DAC-110		This carrying case allows the AED to be stored in a harsh environment where it may need extra protection.
Specialist Medium Data Card	DDC-6		This specialist data card is designed for use specifically with the defibrillator. It can be used to download data from the AED to analyse incidents and any faults with the AED.
AED Inspection Tag	DAC-801		The inspection tag can be hung on a hook next to the defibrillator to allow a record to be kept of what date and which person inspected the defibrillator
9 Volt Lithium Battery or 9 Volt Alkaline Battery	DAC-401		The 9 volt battery is located within the main lithium battery and powers the defibrillator self tests and status indicator light. This needs to be replaced approx every 18-24 months. It is available in Lithium or Alkaline (Lithium has a longer life than Alkaline)
